The picture below shows a portion of our Show Room with Shower Doors and Bathtub Enclosures erected on our floor, giving you an idea of their general appearance when permanently installed in the home.

Note particularly the tub enclosure in the front right hand portion of the picture. It shows how our model No. 160 converts the average bath into a striking glass enclosed shower of lasting beauty.

**O**UR products are divided into three separate and distinct classes as follows:

RESERVE MODEL

STANDARD MODEL

DE LUXE MODEL

THE metal entering into the construction of these models consists entirely of composition bronze and brass. All channels, angles and special shapes are extruded through dies, insuring evenness and uniformity in the process of manufacture. All screws and other fastenings are made of brass. No iron or steel is used in any part of our shower doors or bath enclosures, thus obviating any possible chance of corrosion or stain on the chromium finish through oxidation.

The packing used for the installation of glass is composed of mineral and vegetable compounds of great durability, does not deteriorate with age, and is impervious to water. The glass is installed in the channel frames packed under pressure to insure a watertight fit.

Each entire structure is highly polished and chromium plated, making a beautiful finish impervious to water.

#### INSTALLATION

THERE is no special work required in the installation of our doors or enclosures, as all are custom made to suit individual specifications and requirements.

#### KEY MODEL

CONSISTS of  $\frac{7}{8}$ " special extruded channel, select crystal sheet glass, full length piano hinge, and metal drip apron. Mortise and tenon joints.

THIS MODEL MADE FOR INSTALLATION ON TILE ONLY

#### RESERVE MODEL

THIS consists of 1" channel frames with Mortise and Tenon joints secured at corners with machine rolled, corrugated taper pins, and angle return full-length piano hinge, also metal drip apron. These doors are made with or without grill at top, or with scroll ornaments and urn, all as illustrated on our Blue Print No. 200. Thickness of glass is  $\frac{1}{4}$ " polished plate.

#### STANDARD MODEL

THIS construction consists of 1" channel frames with miter joints securely fastened at corners with brass countersunk screws. Also full-length hinge and angle combination, and metal drip apron. These doors are made with or without grill at top, or with scroll ornaments and urn. Thickness of glass is  $\frac{1}{4}$ " "polished plate."

The separate shower or bathtub enclosures consisting of door and one or more panels are fitted with adjustment channels to compensate for walls built out of plumb.

#### DE LUXE MODEL

THIS consists of  $1\frac{1}{4}$ " channel frames with mitered joints securely fastened at corners with brass countersunk screws. Special features of the De Luxe construction are channel and chair shapes for adjustment to irregular walls; baffle fittings and aprons with curled drip to shed the water inward into stall or tub, all of which are illustrated on blue prints. These doors are glazed with  $\frac{1}{4}$ " mirror quality plate glass.

DOOR No. 10

The ornamental scrolls are made of heavy brass tubing with a bronze urn in center. Entire door chromium plated and completely rust-proof. May be had in all three models. All doors and enclosures have our spring type friction latch which assures ease in opening and closing of door.

Standard Sizes

24" x 72"

26" x 72"

This beautiful shower door is particularly adaptable to the shower stalls having an arch top. The ornamental scrolls blend well with the half circle construction of the stall, and give a very satisfactory finished appearance. Doors are made to assure quality workmanship and are guaranteed against leakage.

DOOR No. 20

Easily and quickly installed, no special work required. May be had in Reserve, Standard and DeLuxe Models. When ordering, specify whether door is to be hinged on right or left wall facing shower compartment.

Standard Sizes

24" x 72"

26" x 72"

One of the most popular models in our complete line is shown here. Priced to fit to a great variety of jobs, it nevertheless carries our quality workmanship throughout. No iron or steel is used in any part of our doors, thus obviating any possible chance of corrosion or stain on the chromium finish through oxidation.

DOOR No. 10 with  
G-65 glass

When ordering a door to be installed on marble, specify accordingly. Also mention whether it is to have a fancy glass as it is not a standard unit.

Standard Sizes

24" x 72"

26" x 72"

In the homes where a more decorative glass panel is desired, the model shown here is very popular. This design is guaranteed to last indefinitely and is listed as our G-65 glass. This picture shows how a shower door may be installed on marble jambs. For more details of this type of installation, see our blue print No. 205.

DOOR No. 40

We have gone to great expense to install special machinery, tools and dies so that we might offer this newly designed door to the public. These grills are 1 in. wide and run the width of the door. They are pitched downward at a 28 degree so that any condensation forming on the grills will drain back into the shower stall. This type of door is manufactured only in our DeLuxe Model.

With the new equipment which we now have, we are able to manufacture any special type door or enclosure you may need. Since we specialize in these products, we can assure you that your order will be handled by skilled workmen with years of practical experience.

TUB ENCLOSURE  
SHIELD No. 100

Easily and quickly installed. No special work required. Can be made to swing out or remain stationary. Drilling of tub or shield clamps optional. Specify right or left wall for hanging.

Standard Size  
32" x 54"

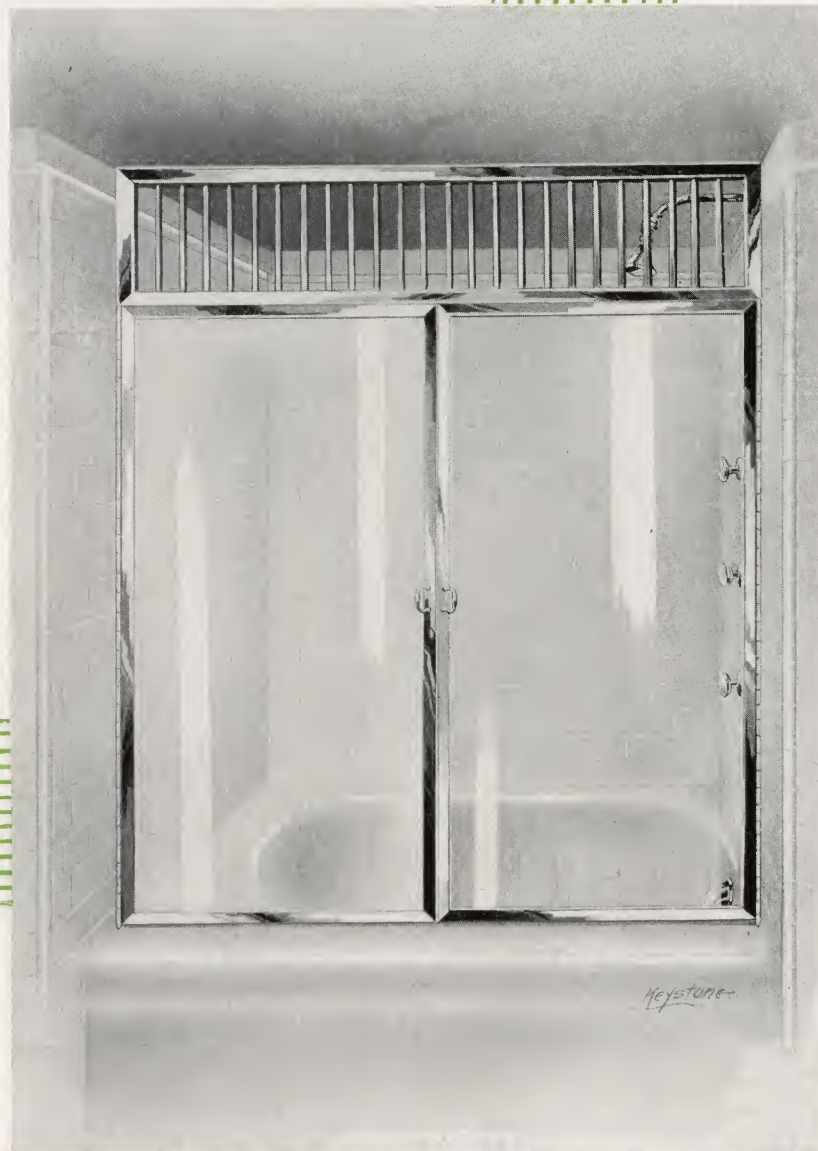

This inexpensive panel is one of the most economical ways to bring modern beauty and sanitation to the bathroom. A special spring catch is used to hold the shield parallel with tub when in use. A dependable baffle sheds the water back into the tub eliminating possible leakage.

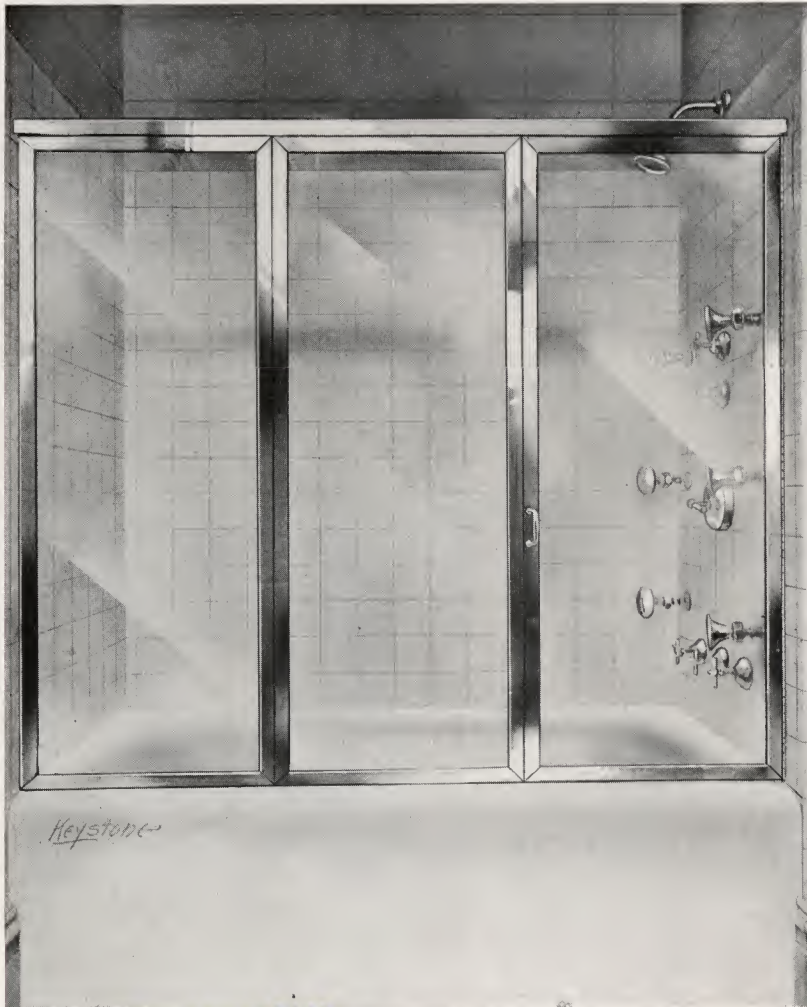

BATH TUB ENCLOSURE No. 110

Each door has a full standard height of 56". The chromium grill matches the other fittings perfectly and is 9" high. If either panel is to be stationary, specify accordingly. All enclosures are made to fit a 5 or 5½ foot bath tub unless otherwise specified.

Many people prefer this two-panel enclosure in modernizing their bathroom. Its exceptionally wide doors allow easy entrance and exit to and from the shower. If preferred, one door can be made stationary. The attractive grill at the top may be eliminated; although its installation adds beauty to the enclosure.

TUB ENCLOSURE  
No. 120

Height of enclosure prevents any water spraying over its top. If desired, the attractive grill shown on page 11 can be added to this enclosure. Specify if door is to be placed in center or on either end. Enclosure made for 5 or 5½ foot tub.

This three-panel enclosure provides a very elaborate method of enclosing the tub in homes requiring the finest and most attractive furnishings. The door may be placed in the center or on either end. In either case, the stationary panels can be fitted to insure tight closing of the door to prevent any leakage.

BATH TUB ENCLOSURE No. 130

This unusual enclosure has been designed for the new Neo-Angle bath tub. The perfect fit has been obtained only by sparing no expense in securing dies for its manufacture. Thus you have a really beautiful enclosure for this latest type of bathroom fixture.

Doors arranged to allow easy entrance to bath and use of shower fittings. If desired, two doors may be had in this type of installation. Manufactured only in standard construction as in illustration. An attractive grill may be added at the top of the entire enclosure upon specifications.

TUB ENCLOSURE  
No. 140

Height of enclosure prevents any water spraying over its top. Grill may be had if desired. Doors and panels may be arranged to meet with your specification. When ordering, mention whether door is to be in center and if door is to be hinged on right or left hand side facing bathtub. Height of enclosure 56".

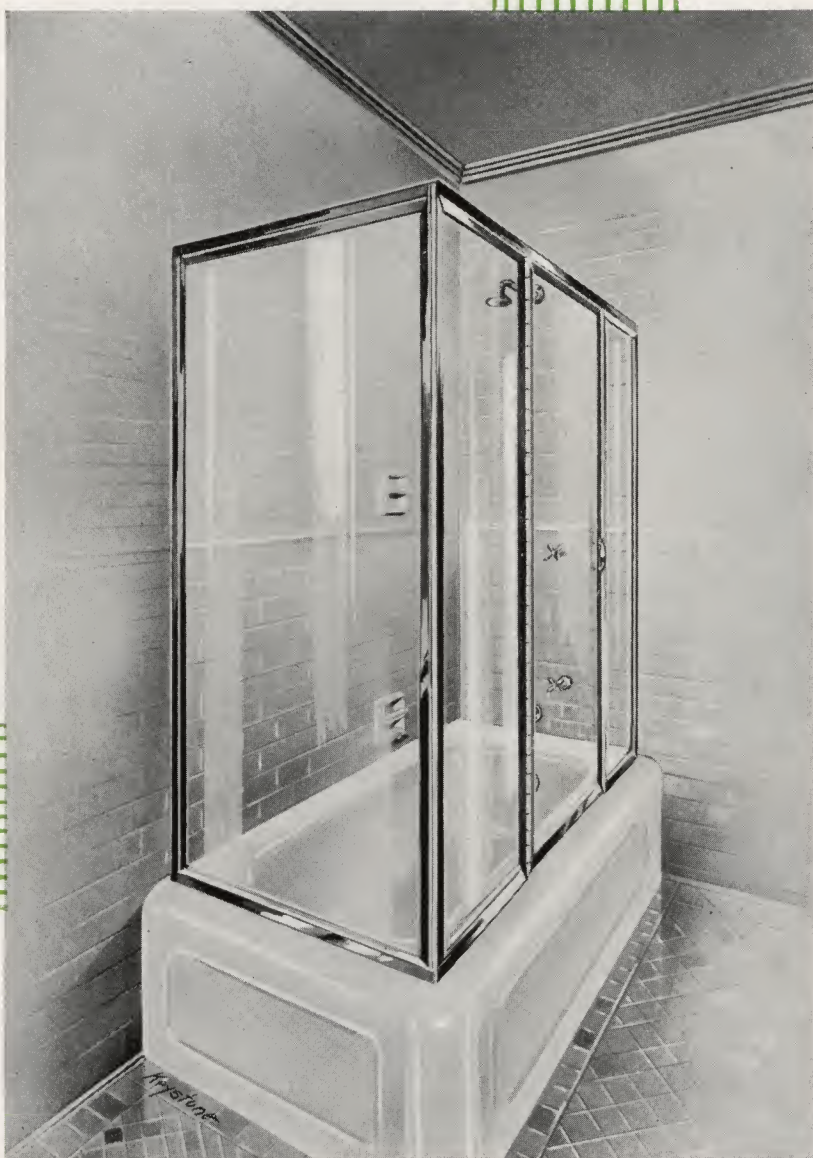

The new four-foot-square bath tubs are becoming more popular every day. In order to have a complete line of shower enclosures, we have designed the model shown here to especially fit the new fixture. You will find its general design thoroughly in keeping with the appearance of the small tub.

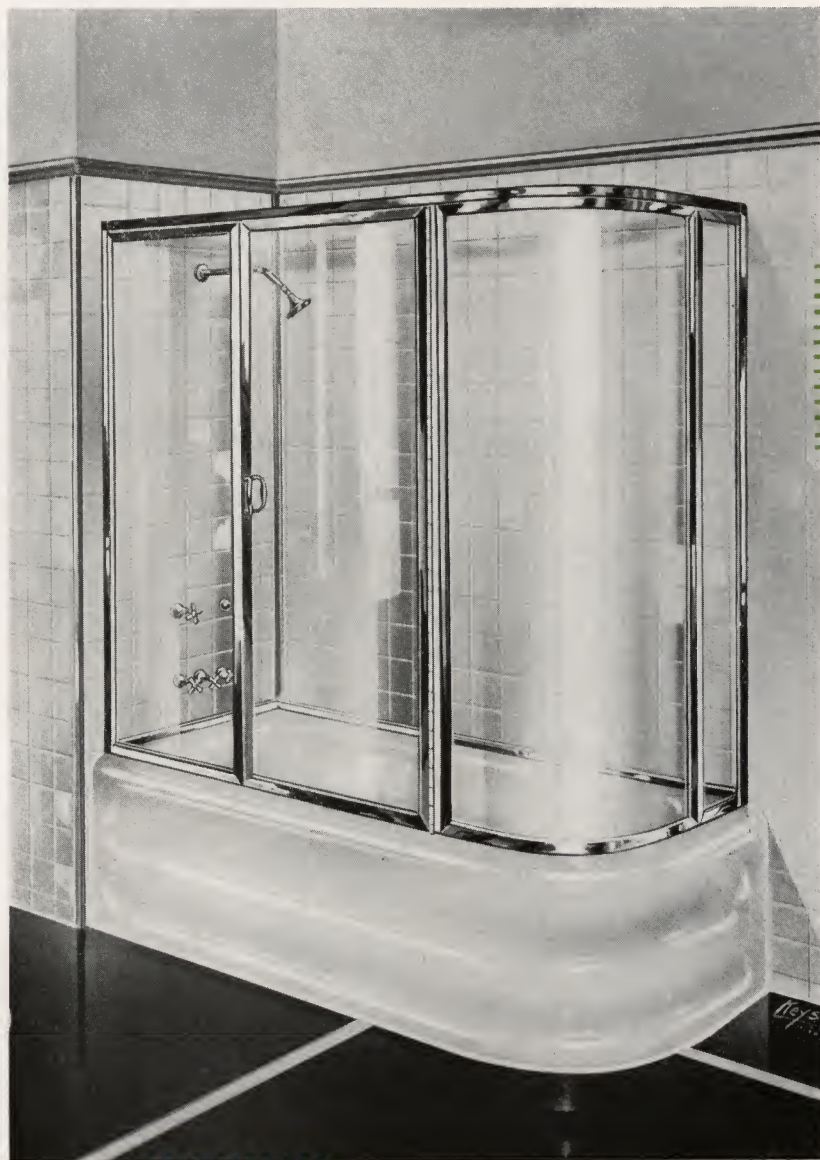

BATH TUB ENCLOSURE No. 150

Available in Reserve, Standard and Deluxe models. Panels and doors can be arranged to suit individual requirements for placing door where desired. Brass bars used to insure a firm rigid enclosure for this special type of fitting. As in all other models, a grill may be had if desired.

One of the newest and most practical methods of enclosing a tub recessed on two sides is shown here. This glass enclosure allows the greatest possible amount of light to come into the shower for convenience in bathing. We can fit any tub of this type.

BATH TUB EN-  
CLOSURE

No. 160

Available in Standard and De-luxe models. Quad-rant panel can be right or left and is made to suit each individual tub. Spe-cial tools used to give proper radius for rounded portion of tub. May be had with or without grill.

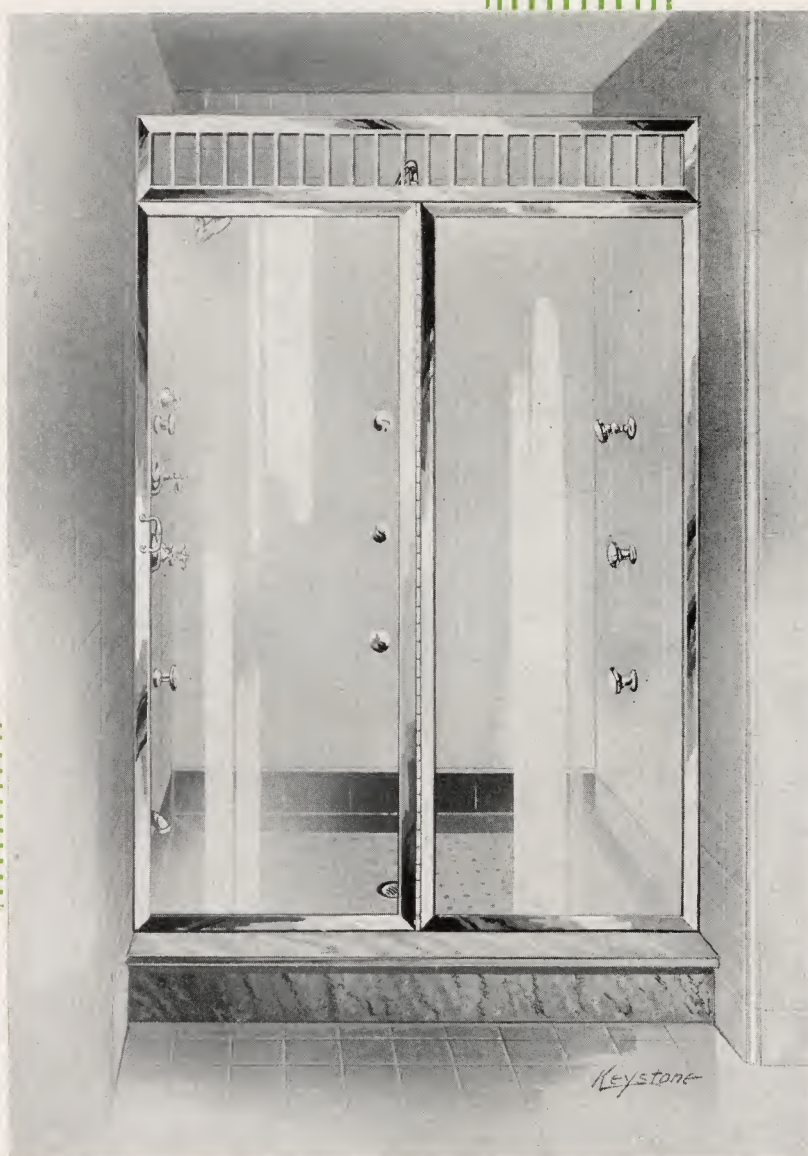

Architects and builders have long sought a practical and sanitary way to enclose bath tubs of this type. Many have found the enclosure shown here to give them exactly what they desire—a beautiful rigid enclosure with a striking beauty that is admired wherever installed.

STALL ENCLOSURE No. 200

Many homes in which there is not sufficient room to install another complete bathroom, often find a shower stall the answer to the problem of additional bathing facilities. An attractive glass stall enclosure is naturally the only thing to use in furnishing such a modern addition to the home.

May be had without grill if desired. Can be made with both panels to swing out. If so, specify accordingly. Manufactured in Reserve, Standard and Deluxe Models. Each door and panel 24" x 72" with 9" grill.

#### ENCLOSURE

No. 210

Available in Reserve, Standard and Deluxe Models. Doors and panels can be arranged to your specifications. Standard size of each panel and door 24" x 72". Although can be made to your dimensions. May be had with grill.

When an additional shower stall is to be put in an old home or built in a new one, it is often to be of a larger size than usual. To meet these requirements, we have designed the enclosure shown here with its two stationary panels and door.

## ENCLOSURE No. 220

Here is another type of small enclosure, designed and manufactured by us to suit an irregular building condition. Each enclosure is handled in our organization by experts in their particular line and considered as a custom made job by them. This assures you of getting the best possible attention to your individual problem.

May be had without grill if requested. Doors and panels can be arranged to suit your plans. Height and width may be added to or deducted from.

## Standard Size

|        |           |
|--------|-----------|
| Panels | 8" x 72"  |
| Door   | 24" x 72" |
| Grill  | 9"        |

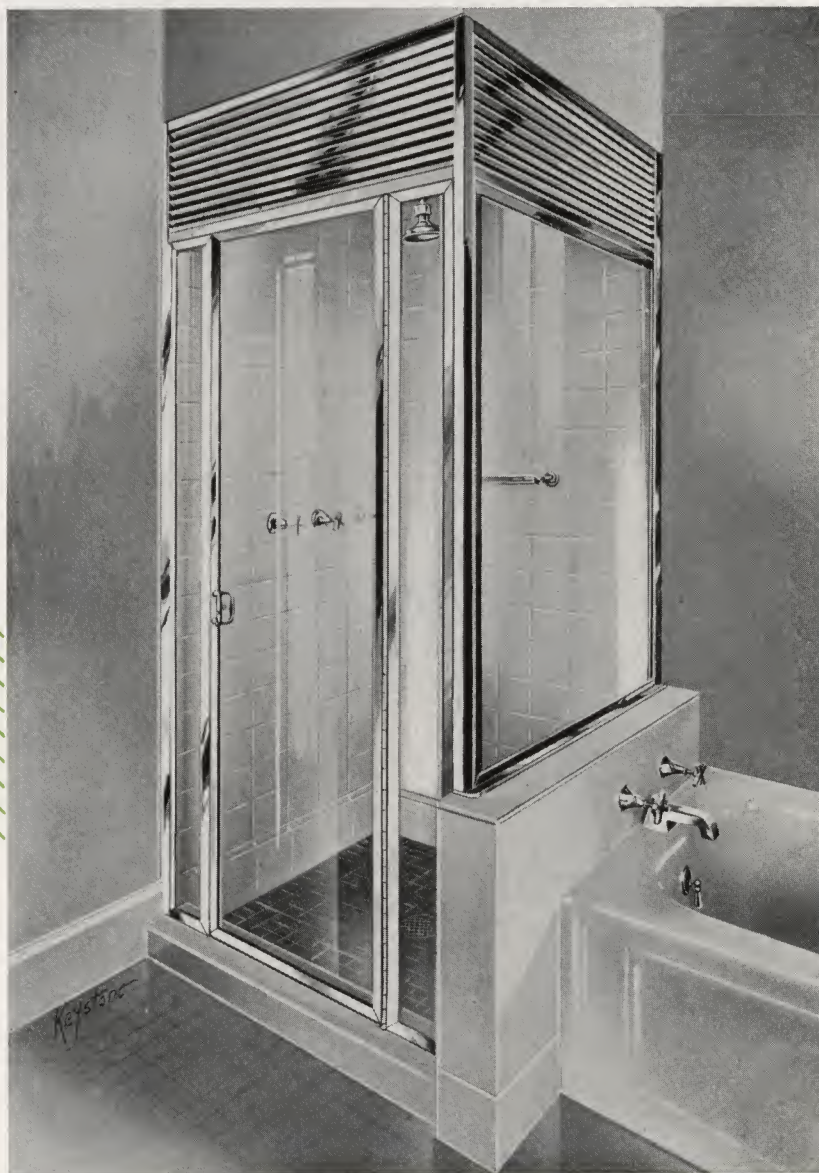

STALL ENCLOSURE No. 230

This enclosure can be made to suit irregular building conditions. All fittings chromium unless otherwise specified. May be had with grill. Standard Size—wide panel 36" x 72".

Narrow panel  
12" x 72" and  
door 24" x 72"

Through years of experience, we have been able to meet the most exacting requirements. Note in the installation shown here how the extra wide panel on one side and the narrow panel and door on the other side make this corner shower stall a beautiful fixture.

STALL ENCLOSURE No. 240

This picture illustrates a special shower stall enclosure of our DeLuxe construction built for a prominent resident of Philadelphia. It shows that we are qualified to manufacture shower door and enclosure to suit all irregular building conditions.

Our Standard finish on all products are in a lustrous chromium although satin, bronze or gold finish may be had if desired.

We would appreciate the opportunity of working with you on your shower door or enclosure problem in order that we may show you how an attractive bathroom can be made with one of our installations.

The decorative designs illustrated here are carved into the glass panels by a special process and are part of the glass itself. They may be cleaned in the same manner as ordinary glass.

G-5, G-15, G-25, G-35 and G-65 border designs executed in carved lines with the greatest portion of the glass clear. The same designs may be carried out in clear glass with the balance of the glass in a frosted surface.

Your own design, monogram, coat-of-arms, etc., can be faithfully reproduced from any sketch, photograph or painting, or we will submit sketches based on your own ideas for your approval.

*For Your Convenience*, we now have Authorized Agents in all large cities who will be glad to cooperate in working out your particular problems on shower doors and stalls. For information in this connection please write to:
